

Vysoká škola  
technická a ekonomická  
v Českých Budějovicích

The Czech Republic, also called Czechia, is a country located in central Europe. It comprises the historical provinces of Bohemia and Moravia along with the southern tip of Silesia, collectively often called the Czech Lands. In 2016 the country adopted the name “Czechia” as a shortened, informal name for the Czech Republic. The Czech Republic borders Germany to the west, Poland to the north, Slovakia to the east, and Austria to the south. The country’s population is 10.4 million people. The country joined the European Union in 2004.

**The Institute of Technology and Business in České Budějovice (VŠTE)** is a modern educational institution situated in České Budějovice, a well-preserved historical city founded in 1265 on the confluence of the Vltava and Malše rivers. With its population of almost 100,000, České Budějovice is the capital of the South Bohemian region.

Our Institute was founded in 2006, thus becoming the youngest public college in the Czech Republic. VŠTE, as a holder of numerous trademarks, is a professionally-oriented technical and economic college, which offers study programmes based on the current requirements of the labour market.

We place a strong emphasis on students’ practical skills and closely cooperate with more than 1400 significant companies active in civil engineering, mechanical engineering, business, and other fields in the Czech Republic and abroad. Students gain professional experience in the partner organizations for one semester, to the extent of 520 hours, and can opt for a study period or work experience abroad. Such work experience abroad enables our students to complete the compulsory Practical training course.

Our Institute financially supports study stays abroad, and our students can choose from a wide range of long-term and short-term stays abroad that last the whole semester or academic year.

VŠTE received many regional, national, and international awards and co-organizes several international conferences.

VŠTE has also become a trans-regional academic institution and shows a significantly faster growth through its focus on students’ practical skills and high graduate employability in the labor market.
